

Talal Abu-Ghazaleh – Confucius Institute

TAG-Confucius Newsletter | Issue 119 - April 2026

TAG-Confucius Institute:

The Institute was established in September 2008 to introduce the Chinese language and culture, as well as achieving a greater mutual understanding between the Arab and Chinese cultures. This unique initiative is based on the cooperation agreement between TAG.Global and Confucius Institute in China. The Institute has been named after the great intellectual, mentor and philosopher, Confucius, whose ideas had influenced China and other regions around the world for over 2,000 years.

IN THIS ISSUE:

TAG-Confucius Institute is the first institute accredited by the Chinese Government to teach Chinese language in Jordan.

TAG-Confucius Institute is holding a new course to teach the basics of the Chinese language for beginners:

A. Threshold Level for Adults: starting 6/4/2026

Schedule: Monday – Wednesday from 5:30 – 7:30pm.

B. Threshold Level for Kids: starting 4/4/2026

Schedule: Saturday – Wednesday from 3:00 – 4:30 pm

***All Chinese language teachers are from China specialized in teaching Chinese language for foreigners and accredited by the Confucius Institute in China.**

TAG-Confucius Institute Holds a series of Celebrations for 2026 International Chinese Language Day

From April 8 to 15, on the occasion of the upcoming International Chinese Language Day, TAG-Confucius Institute (TAG-CI) held a series of celebrations under the theme “Chinese: Sparking Colorful Dreams”.

The program featured a variety of activities, including special program filming, Chinese culture on campus, themed lectures, and cultural experience sessions, showcasing the vigorous development of Chinese language education in Jordan. About 100 participants, including Dr. Yang Songfang, Chinese Director of TAG-CI, faculty members and students, took part in the event.

During the event, TAG-CI collaborated with ChinesePlus and China Media Group to film

a special International Chinese Language Day program. Focusing on “Learning

Chinese in the Age of AI”, students shared how artificial intelligence supports reading,

translation, and grammar analysis, while also noting its limitations in emotional understanding and linguistic nuance.

They emphasized that face-to-face communication and sustained learning remain essential. The program highlighted emerging trends in AI-empowered Chinese language education and students' thoughtful perspectives.

At the "Chinese culture on campus" initiative, a TAG-CI teacher organized a calligraphy workshop for Grade 1 and Grade 7 students at Marshall International School. Under the teacher's guidance, the students learned basic brush strokes and writing techniques, gaining firsthand experience of the structural beauty and artistic charm of Chinese characters.

Meanwhile, themed cultural experience activities were held at TAG-CI. Through mini-lectures, students were introduced to the origins

of International Chinese Language Day, as well as cultural stories related to the Grain Rain solar term and Cangjie's creation of Chinese characters.

Hands-on activities such as calligraphy, tea art, and paper cutting were also organized. These immersive experiences deepened students' understanding of traditional Chinese culture and sparked enthusiastic participation.

The series of International Chinese Language Day celebrations concluded

successfully in a warm and vibrant atmosphere.

Through immersive experiences and diverse interactions, the events effectively enhanced local students' interest in learning Chinese and strengthened their appreciation and understanding of Chinese culture. Looking ahead, TAG-CI will continue to innovate its program formats, deepen people-to-people exchanges between China and Jordan, and promote the high-quality development of international Chinese education.

TAG-Confucius Institute Successfully Holds Its First CTC Test

On April 18, TAG-Confucius Institute (TAG-CI) successfully held the Certificate for Teachers of Chinese to Speakers of Other Languages (CTC) written test (Elementary Level). This marks its first time serving as an officially authorized test center, signifying a key step forward in strengthening Chinese language testing service and supporting the professional development of Chinese language teachers.

As a first-time organizer, TAG-CI made thorough preparations. The invigilators completed two training sessions organized by Chinese Testing International (CTI), and a coordination meeting was held to streamline procedures, clarify responsibilities, and ensure effective test room management and emergency response. The test environment and admission procedures were also optimized to guarantee smooth implementation.

On the test day, operations were orderly and well-managed. The candidates completed identity checks and entered the test room in an organized manner. The invigilators conducted their duties with fairness and professionalism, while the candidates demonstrated strong competence and focus. The test proceeded smoothly.

After the test, the materials were properly handled and returned to CTI, and the candidates expressed high satisfaction with the organization and professionalism of the test team.

CTC test is widely recognized as an important benchmark in international Chinese language education. Its successful administration marks a significant milestone for TAG-CI. Looking ahead, TAG-CI will further integrate teaching and testing, supporting local Chinese language teachers through training programs and academic workshops, and contributing to the high-quality development of Chinese language education in Jordan.

Notably, the next CTC written test (Elementary Level) at TAG-CI will be held on June 27, 2026. Registration will be open from May 19 to May 28. All eligible candidates are warmly welcome to register and participate.

Waterfalls in China

China is home to some of the world's most spectacular waterfalls, ranging from towering single drops to multi-tiered cascades, each offering unique natural beauty and cultural significance.

Notable Waterfalls

Huangguoshu Waterfall – Located in Guizhou Province, Huangguoshu is the largest waterfall in China and one of the tallest in the world, standing at 77.8 meters high and 101 meters wide. The surrounding Huangguoshu Waterfall National Park features 18 waterfalls, scenic mountains, and attractions like the Water-Curtain Cave, where visitors can walk behind the cascade for a unique perspective.

The best visiting period is from June to October, with 3–4 hours recommended to explore the main areas.

Hukou Waterfall – Straddling Shanxi and Shaanxi provinces, Hukou is the only yellow-colored waterfall in the world, formed by the Yellow River narrowing from 300 meters to 50 meters before plunging into a 30-meter-deep basin. Its dramatic seasonal changes and powerful flow make it a striking natural spectacle.

Changbai Waterfall – Situated in Jilin Province, this waterfall is the exit point of Tianchi (Heavenly Lake) and is the highest volcanic waterfall in the world at 68 meters. Visitors can view it via an easier western route or a more challenging climb for panoramic views.

Jiulong (Nine Dragons) Waterfalls – Located in Luoping, Yunnan, this multi-tiered waterfall group spans 4 km with ten cascades. The largest, Shenlong Waterfall, is 56 meters

tall and 114 meters wide, featuring a hidden cave behind the water curtain. The area is surrounded by vibrant seasonal flowers, making it ideal for photography and romantic exploration.

Zangbu Badong Waterfalls – Deep in the Yarlung Tsangpo Grand Canyon in Tibet, this remote waterfall group includes Bailang Waterfall, which drops nearly 100 meters. Known for its immense power and misty canyon environment, it is accessible only through licensed scientific or expedition groups, offering a rare and pristine experience.

Visiting Tips

- **Best Seasons:** Many waterfalls, like Huangguoshu and Jiulong, are most impressive during the rainy season or autumn when water flow and visibility are optimal.
- **Accessibility:** Some waterfalls, such as ZangbuBadong, require guided expeditions, while others like Huangguoshu and Hukou have developed viewing platforms and trails suitable for families.
- **Unique Experiences:** Walking behind waterfalls, aerial views via helicopter rides, and exploring multi-tiered cascades provide immersive experiences for visitors.

China's waterfalls offer a diverse range of natural beauty, from the thunderous power of Hukou to the serene multi-step elegance of Jiulong, making them must-visit destinations for nature lovers, photographers, and adventure seekers alike.
