Qatar Launches Five New Digital Intellectual Property Services

Saudi Authority for Intellectual Property Issues Executive Regulation to Launch Geographical Indications Regime

AGIP Joins TDRA National Campaign to Boost UAE Digital Identity, Encourages Businesses and Individuals to Secure .ae Domains

DUBAI - AGIP announced its support for the Telecommunications and Digital Government Regulatory Authority (TDRA) national awareness campaign promoting the adoption of the UAE's country code top-level domain, .ae. The initiative seeks to strengthen the country's digital presence by encouraging businesses, entrepreneurs and individuals to register trusted .ae domains, reinforcing credibility and identity in the UAE's growing digital economy.

A reliable national domain is more than a web address; it signals authenticity, fosters consumer trust, and helps local organizations stand out in a competitive online environment. As part of the campaign, AGIP will actively promote .ae registrations, provide guidance on domain selection, and support local entities in establishing secure, recognizable digital identities that align with UAE values and regulations.

TDRA's campaign complements broader national efforts to fortify the country's digital infrastructure and to promote safe, trusted online spaces where economic activity can thrive. By aligning with TDRA's objectives, AGIP hopes to contribute to a more unified, secure and trusted national internet presence that benefits consumers, businesses and the wider UAE economy.

Abu-Ghazaleh Intellectual Property in Shanghai Listed Among Top Agencies in the 2026 MOZLEN Report with “AAA+++” Rating

LONDON - Abu-Ghazaleh Intellectual Property in Shanghai has been listed among the top agencies in the highly anticipated 2026 MOZLEN Ranking (International Edition) of Chinese trademark agencies for foreign-related matters. AGIP has achieved the highest rating of “AAA+++”. The ranking was officially released in London on May 2, 2026, and recognized outstanding Chinese firms in the field of foreign-related trademark services.

Compiled based on trademark big data and comprehensive institutional influence, the MOZLEN Ranking (International Edition) serves as an important evaluation system for professional Chinese agencies handling foreign-related trademark matters. It aims to showcase the overall capabilities and service levels of these agencies and provide an authoritative reference for international businesses and IP professionals.

In this year’s ranking, Abu-Ghazaleh Intellectual Property (AGIP) China, with its exceptional professional strength, has been listed alongside other leading institutions such as CCPIT Patent and Trademark Law Office, Wanhuida Intellectual Property, and Bird & Bird Law Firm. This demonstrates AGIP’s outstanding performance in the field of IP professional services.

As a key part of AGIP’s global expansion strategy, AGIP China has extended its services across Greater China, facilitating communication and cooperation between IP owners in the region and the international IP community. Being listed among the top ranks of the MOZLEN Ranking is a high-level international recognition of its professional capabilities and reflects the continuous improvement of Chinese agencies in foreign-related trademark matters.

Following the release of the ranking, several international companies and IP organizations have expressed their interest in the development of China’s foreign-related trademark agencies and look forward to expanding their collaboration with the listed firms.

We at AGIP are honored to be recognized in the 2026 MOZLEN Ranking. This recognition validates our commitment to delivering cross-border trademark services of the highest standard. We will continue to strengthen our regional capabilities and collaborate with international partners to protect and grow our clients’ brands worldwide. The “AAA+++” rating is a reflection of our efforts and we are honored to receive this recognition. As we look towards the future, we aim to continue providing top-notch services and exceed expectations to remain a trustworthy and reliable partner for our clients.

Qatar Launches Five New Digital Intellectual Property Services

DOHA - The Ministry of Commerce and Industry of Qatar has announced the launch of five new electronic services for intellectual property on its official website, expanding the total number of online IP services to seven. This move is part of the ministry's ongoing effort to streamline procedures, raise service quality, and accelerate digital transformation across IP administration.

The newly introduced services allow users to apply for a certificate of deposit and protection for copyright and related rights, request a "to whom it may concern" certificate, obtain an extract of a copyright and related rights certificate, modify an existing copyright application, and request the transfer of ownership for a copyright deposit certificate. These additions simplify access to key copyright procedures for creators and rights holders, reducing the need for in-person visits.

Expanding Qatar's digital IP services removes barriers for creators and rights holders and strengthens the protection of creative works nationwide. These new services make it easier for individuals to apply for certificates and request modifications, ensuring that their intellectual property is properly protected.

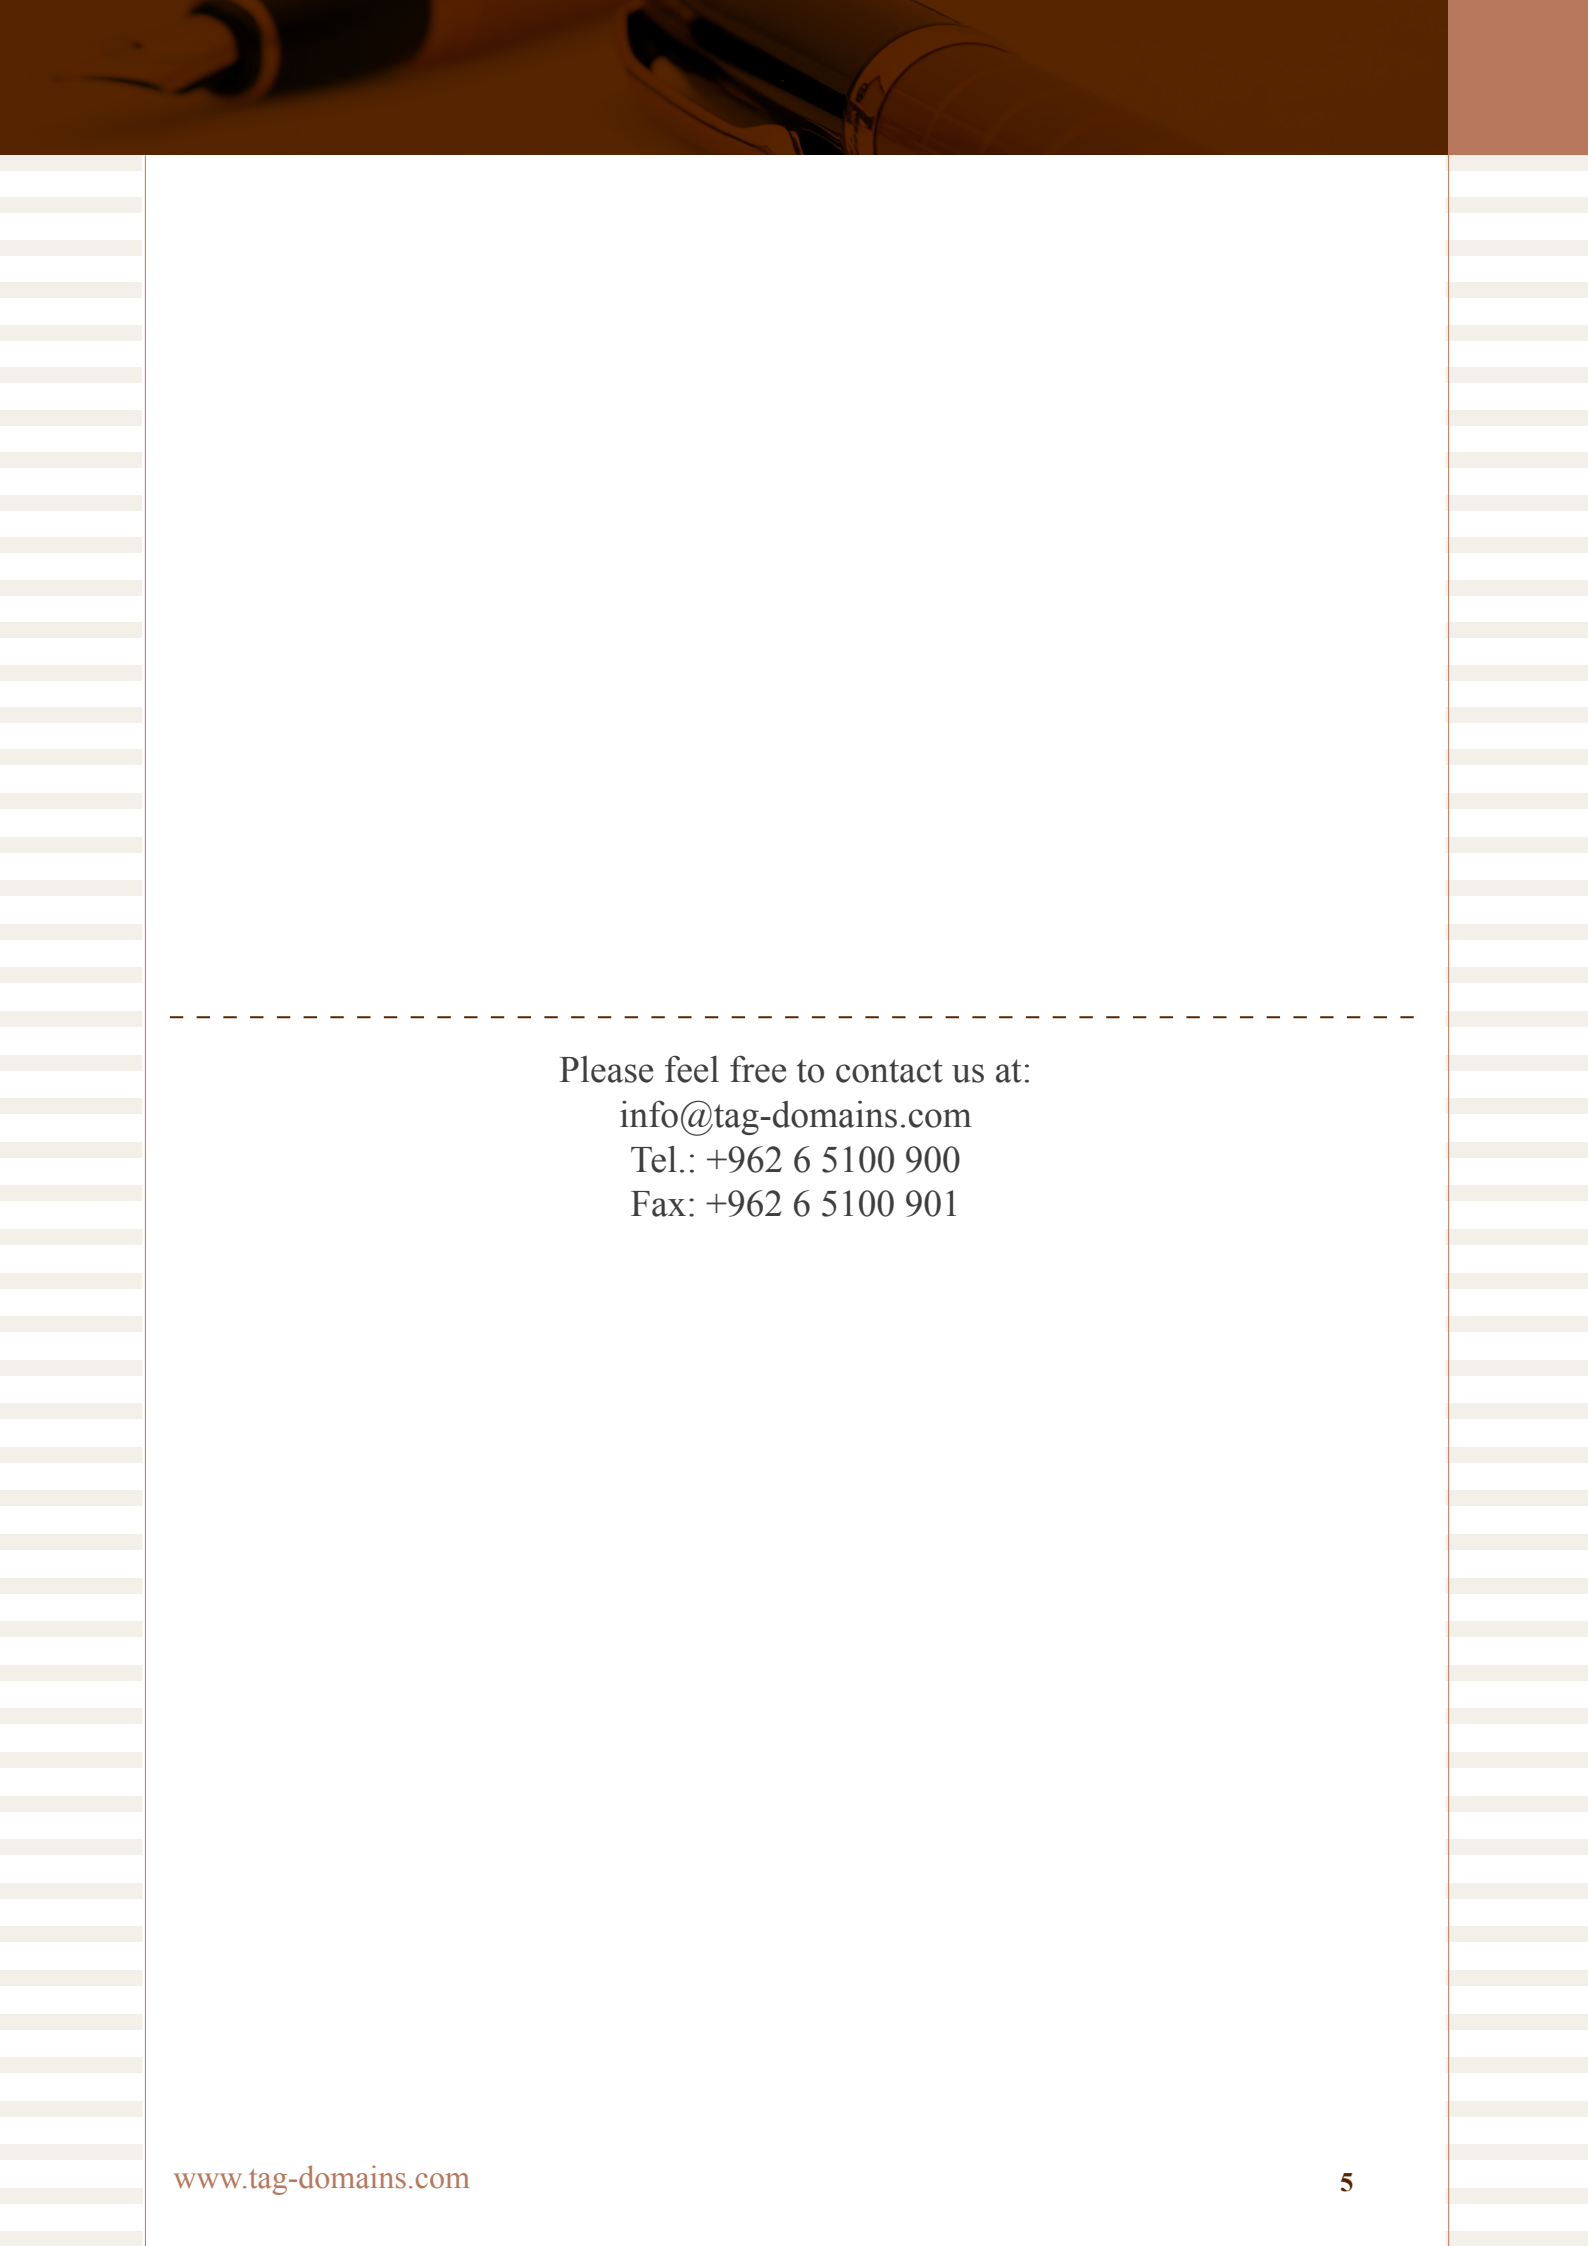

Furthermore, the launch of these services on the official website of the Ministry of Commerce and Industry of Qatar demonstrates the government's commitment to embracing digital transformation and making processes more efficient for its citizens. It also showcases their dedication to protecting the rights of creators and promoting a thriving creative industry in the country.

Saudi Authority for Intellectual Property Issues Executive Regulation to Launch Geographical Indications Regime

RIYADH - The Saudi Authority for Intellectual Property (SAIP) has issued the implementing regulation for the Kingdom's new Geographical Indications (GI) Protection Law, marking the start of official procedures to register, use, and enforce GIs in Saudi Arabia. The regulation, published in Umm Al-Qura under SAIP Decision 2026/39/01 (Decision 39), gives practical implementation to the GI law approved by the Council of Ministers in November 2025.

This executive regulation outlines the steps that producers and collective groups must follow when applying for GI status, defines the conditions for use, and provides a framework for enforcing the protection of origin-linked products from imitation. By establishing clear administrative and legal rules, SAIP's decision aims to create a predictable framework that supports producers who link their goods to a specific place, reputation, or production method.

For Saudi businesses, the GI regime offers a strategic tool to move beyond commodity pricing and to capture value through recognition of quality, authenticity, and regional identity. Producers of foodstuffs, crafts, and other region-specific goods will now be able to seek formal recognition, enhancing market differentiation at home and abroad, while also gaining legal recourse against any misleading use of their product names.
